Product(s)	Crescendo® Paperboard PrintKote® Paperboard TruServ™ Cupstock Paperboard
Manufacturing Location	WestRock Covington Mill Covington VA

European Union Regulation (EC) No. 1907/2006 Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH)

The paperboard referenced above meets the conditions of an “article” as defined in REACH. Under normal and reasonably foreseeable conditions of use, no substance is intended to be released from this paperboard and therefore do not contain substances requiring registration under REACH. This product does not contain any substance listed on the Candidate List of Substances of Very High Concern (SVHC) for Authorization, published by ECHA as of 27 June 2018, in a concentration above 0.1% (w/w). WestRock does not intentionally add any of these SVHC to the paperboard grade referenced above. Furthermore, the content of substances in this product meets the restrictions outlined in Annex XVII of the REACH Regulation.

EU RoHS and WEEE Directives

The following information applies to European Council Directives 2011/65/EC as amended by 2015/863, on the restriction of the use of certain hazardous substances in electrical and electronic equipment (“RoHS”) and 2012/19/EC, on waste electrical and electronic equipment (“WEEE”). The scopes of the RoHS and WEEE, as set forth in Article 2 of those Directives, do not include packaging or packaging materials but rather applies only to electrical and electronic equipment as defined in Article 3 (a). As such, the requirements of RoHS and WEEE are not applicable to paperboard as sold to your company by WestRock when used as packaging.

The chemical content and waste minimization issues addressed in WEEE and RoHS for electrical equipment are covered for packaging under European Council Directive 94/62/EC on packaging and packaging waste. This Directive prohibits both the presence of lead, mercury, hexavalent chromium and cadmium above a combined concentration of 100 parts per million and the intentional use of these four metals in packaging materials. The above listed paperboard product meets this limitation. This limitation is more stringent than the limit set forth in RoHS and WEEE.

In addition to the four heavy metals discussed above, RoHS also covers the use of poly brominated biphenyls ("PBB"), poly brominated diphenyl ethers ("PBDE") including decabromodiphenylether and decabromodiphenyloxyde and certain phthalate compounds. WestRock does not intentionally add PBB or PBDE based flame retardants or the listed phthalates to the paperboard products produced for your company.

This determination is based upon information available as of the date of this submission, which primarily includes component supplier disclosures and Safety Data Sheets (SDSs). It may also include technical data sheets; any additional information provided by suppliers; testing, if applicable and available; and/or general industry knowledge.

This letter applies to the materials listed above as shipped and as of the date of shipment. This statement does not alter, amend, supersede or in any way affect WestRock's Terms and Conditions, and/or any other written contractual commitments between the parties.

Authorized Persons:

A handwritten signature in black ink that reads "Richard J. Watro". The signature is written in a cursive style with a large initial "R".
