

To Whom It May Concern

This is to state that all Copy Paper (including NOVAL) produced by Asia Symbol (Guangdong) Paper Co., Ltd. is made of ECF pulp, which is 100% recyclable. Neither halogenated bleaching agents that produce elemental halogens in-situ, nor non-biodegradable complexing agents such as Ethylene Diamine Tetraacetic Acid (EDTA) or its derivatives are added in the paper production.

亚太森博（广东）纸业有限公司生产的复印纸产品（包括 NOVAL）采用无元素氯漂白的纸浆，这些浆 100% 可回收利用。纸品生产过程中不添加卤化漂白产生的单质卤素原位剂，不添加非生物可降解络合剂如乙二胺四乙酸（EDTA）或其衍生物。

Yours sincerely,

Li Qinglan

Deputy Technical Manager
